

IN AN EXCEPTIONAL EARLY PREMIER, JEANNEAU TO UNVEIL THE CAP CAMARAT 8.5 WA<sup>NEW 2011</sup>

A REFINED CONCEPT FOR GUARANTEED PLEASURE

**The Cap Camarat 8.5 WA benefits from the full breadth of Jeanneau's experience acquired in the conception of the Walk-Around (or Sun Deck) design, a forerunner in Europe.**

To integrate into Jeanneau's existing line of Walk-Around models, the new Cap Camarat 8.5 WA is designed for both coastal cruising and fishing. She is further defined by the following key points.

- An elegant design by Sarrazin Design
- A traditional Jeanneau hull
- Single or twin-engine power
- Exceptional ease of movement onboard
- An open cockpit
- A large, "ultra flat" forward sundeck
- A comfortable interior with shower, to accommodate 4 people

The innovative new "sea view" windows in the hull, the ventilation system in the cabin, the position of the galley, and the modularity of the cockpit all contribute to the winning personality of the Cap Camarat 8.5 WA.

With strict observance of Jeanneau's fundamental criteria (design – performance – security and comfort onboard – use of space) and with the incorporation of innovative ideas for enhanced comfort onboard, the Cap Camarat 8.5 WA is sure to make a notable entry onto the European market of 8- to 9-metre outboard powerboats.
